WHY CHOOSE IBIS?

Innovative Sump Pump Switch Technology

ACCURATE WATER LEVEL DETECTION

Our product offers accurate water level measurement through solid-state technology, which means there are no moving parts to wear out, you can be confident that your sump pump will operate properly when needed.

INCREDIBLE RELIABILITY & DEPENDABILITY

Our switch is incredibly reliable, with over 3 million cycles and no limits on usage. Plus, our built-in override protection system provides fail-safe redundancy, which means that you are always covered no matter what.

COMPATIBLE WITH ALL SUMP PUMPS

Our universal switch works with all sump pumps, making replacement of your old switch easier than ever before.

We know the importance of protecting your home from unexpected water damage, and that's why we developed IBIS; the most reliable sump pump switch on the market.

IBIS is easily installed and requires minimal maintenance, making it the most reliable and convenient option to keep your basement dry.
